Gyro Target

Pupil sheet

Name: _____ **Date:** _____

Safety: I sit down and hold the box in both hands, elbows on the table. The cable stays slack. I never shake or throw the box.

1. What I see on the screen

The red dot is controlled by **tilting the box**. Do not carry it through the air — the dot then jumps for another reason.

Four levels. A fixed target; a moving target; then the same two again but **with the controls reversed**. The red dot must be held on the target for **two unbroken seconds**.

Today it does not matter who finishes first. **What matters is how much faster you are on the fourth attempt than on the first.**

2. What I do on my own

First I predict. I do not change my prediction after I play.
If I tilt the box to the left, I think the red dot goes: ☐ left ☐ right
At the reversed level, I think that *once I know the rule* I will play: ☐ just as well ☐ worse

because _____

_____

The control map (level 1). I tilt one direction at a time, a little, and watch where the dot goes. I draw an arrow.

What I do with the box	Where the dot goes	Does it stop when I level the box?
Tilt it left		yes / no
Tilt it right		yes / no
Nose up		yes / no
Nose down		yes / no

Which strategy works? ☐ big, fast corrections ☐ small movements, with pauses

3. What I do on my own

Level 3, four times in a row. A classmate keeps the time. **I write down every time, the poor ones too** — a run with the failed attempt missing shows nothing.

Attempt	Time (s)	What I changed since the last one
1		
2		
3		
4		

My graph. I put an X in the right box for each attempt. **The trend is the result**, not any single value.

Time	1	2	3	4
over 40 s				
30–40 s				
20–30 s				
10–20 s				
under 10 s				

The rotation test. I hold the box *flat on the table* and turn it slowly, like a steering wheel.
I predict: the dot ☐ moves ☐ does not move Result: ☐ it moved ☐ it did not

4. The conclusion I write

I predicted that _____

_____

The data show that _____

_____

My hand kept getting it wrong at first because _____

_____

Exit ticket

You knew the level 3 rule from the first second. Why was that not enough?

_____
